The KeyMacro is a flexible way to key your PDF documents. It consists of two parts: the engine and the plug-in. The engine automatically checks every PDF page for keywords that can be defined by the user. If a page is found that matches the specified keywords, the plug-in loads the associated macro which is then used for all subsequent actions on the page. All macros are stored in one central registry on the server. It is possible to define macros for different types of PDF actions and store them in the registry. For example, keywords are used for the actions: "print to file", "annotate", "copy and paste", "save as" and "rename". KeyMacro supports all the PDF actions. ... View more Outline creation: After reading the various PDF formats and creating a document, you now want to put together a clear presentation of your work. Of course, you can do this using Microsoft Word, or any other free tool. But it would be a much more efficient and productive way to do so using novaPDF. This is the power of novaPDF Outline. In addition to a fully functional word processor, novaPDF Outline creates a complete outline in a standardized manner. This means that you are not limited to creating only table-based outlines. In addition, when creating an outline, novaPDF can automatically include page numbers in the titles. With novaPDF Outline, you can: 1) Create a table of contents 2) Create a cover page 3) Create a table of figures 4) Create a list of contents 5) Use a bookmarks system, either hierarchical or index 6) Locate all items by title 7) Use bulleted lists 8) Use numbered or bulleted lists 9) Use pictures or icons 10) Move items 11) Sort items 12) Create flashcards 13) And, yes, you can create an outline in Word format. Every attribute of the page can be set, including a page color. You can even specify a page background color. It is possible to specify a page header and footer. novaPDF Outline allows you to create outlines for PDF files in a standard way and allows you to create different outlines with different options. You can even create a standard library of outlines and store it as a template. KEYMACRO Description: The KeyMacro is a flexible way to key your PDF documents 1d6a3396d6

Microsoft Visual Studio Tools for Office Runtime (2010) and Microsoft Office add-ins (1 of 3) Office system settings On the other hand, you can go beyond these options, and create your own custom settings that will function during the PDF creation process. The tool allows you to choose from a range of system settings (e.g. default margins, font type, print settings, etc.) so you can create a profile that perfectly meets your document creation and editing requirements. Design, editing, and content manipulations During the creation and editing of the documents, the program provides the tools you need to work effectively with a number of standard features and functions that make the document process more efficient and allow you to work more quickly. A PDF editing and design interface that enables you to do much more than just print your documents. Here you have the full power of Adobe Acrobat, the ability to perform layout modifications, and a range of other features you can use to make your documents look better and integrate them into your workspaces. Based on this interface, you can work with several features of the Adobe Acrobat system, such as the creation and modification of form documents, as well as content insertion into the various page sizes (A4, A3, A2, and US Letter), which is more convenient and easier to use. Digital rights management and copyright adjustments From the very beginning of your document creation process, you can use the PDF Maker tool to apply as many different DRM policies as you like (authorization, fingerprinting, watermarking, etc.). From this point on, you can build the documents you need, and when you are done, you can use the optional PDF conversion tool to convert them to PDFs with a number of settings. After the conversion, you can work with them with the Adobe Acrobat tool's PDF Reader interface or use the newly developed novaPDF Standard tool to perform more detailed PDF management, conversion, and editing tasks. Printer and PDF management You can use the novaPDF Standard tool to manage all the printers installed in your system, such as the default print drivers for those printers. Also, you can select the action you want to be performed after the PDF document has been successfully generated. You can also set up job priorities for each printer, select different operating systems, and create separate profiles for different document creation tasks. Document conversion The novaPDF Standard tool supports many popular file conversion algorithms, such as: Filename
