An Enemy We Can Defeat? Stepping on the right triangle, close your eyes and visualize the coastal pieces in detail: adjacent tunnels through the slopes of the hills converge around the north and east gates, and each of them connects at a portal. These portals and tunnels are intact and used for teleports and transportation of troops. This section of the fortress is also fortified by six interlocking walls, and eight hidden walls. If you can keep an eye on, the police officer's shop, the southeast quarter of the town and the concrete overpass visible on the western edge will pose a tough threat to your advance unit. Straight ahead there are three of the toughest enemies in the game, which are special enemies and they can put up a fight. After that, there are five military bases. The layout of the game is pretty good. You start on the center of the southern cliff, where a squad of four hostiles will attack your detachment. You then move toward the south gate of the fortress. However, when you reach the halfway point of your route, there is a huge enemy base in the southern side of the hills. You will need to infiltrate the enemy base to get to your next checkpoint. The next point you need to advance to is a red box car consisting of three rocks, that are connected by ramps. One of these ramps will require you to stop your unit next to the box car, so that you can use it as cover while the unit next to it moves up to the first checkpoint. Then your unit will need to move forward past the enemy troops that attack from the first checkpoint. Start off by moving through the stronghold. In the wasteland south of the main entrance of the palace, an optional bridge called Tropics creates a pathway through the sands to the palace. Tropical trees lined along the horizon give a little shade to those sun-weary soldiers. The terrain south of the stronghold leads to a small island and a peninsula. After crossing this bridge, the cop on top of the palace asks you to loot the structure for the best health recovery. Medic troops should meet the group and an Instigator aircraft will summon a group of Shen warriors

on the island. Once they are destroyed, the Ruins K6X are uncovered, and these ruins allow you to enter Defiles Desert, where you will reach further towards the capitol. From here, an island called Phobos has the support area and engineering depot, while the capitol has two warehouses and some random models. Some patrols will
